Sir:

In response to the Office Action dated March 13, 2002, please amend the above-identified application as follows.

IN THE CLAIMS:

Claims 1-4 now read as follows:

1. (Twice Amended) An integrated circuit for liquid crystal display characterized in that multi-port data output signals are generated with respect to a data input signal, and points of changing said data output signals with respect to a time base are set with time delays that lag one another during one period of a reference internal clock signal, so that number of simultaneous changes of display data output signals is reduced.
